BROCHURES

STOCKS

- 113gsm Gloss - A thin paper typically used for letterbox distribution.
- 150gsm Gloss - Great for marketing flyers and folded brochures.
- 200gsm Gloss - Reasonably thick, high quality and not recommended for folded brochures.
- 100gsm Bond - Used for some of our short run digital brochures. Thicker than normal photocopy paper.

BROCHURES

Custom sized brochures are also available. So if you have a specific requirement just let us know and we can look to make your vision a reality.

Our brochures can also be printed on other stocks. The stocks listed are our standard stocks that can be produced to give you great value for money.

FINISHING OPTIONS

- Matt Varnish - To give your job a silky feel, you can use a Matt Varnish
- Gloss Varnish - To really lift pictures and to make a brochure look vibrant, use a Gloss Varnish
- Folding - The majority of brochures can be folded as shown in this flyer. We do not recommend folding 200gsm stocks as they will crack due to the thickness of the paper. 113gsm or 150gsm are more suited to folding. The lighter stocks may still crack however it may not be as apparent.
- Scoring - Scoring helps to improve the fold quality of your brochures
